

Armored Cable Assemblies for Demanding Industrial Applications

L-com offers an extensive line of metal and plastic armored cable assemblies to address industrial and harsh environment connectivity applications. Our armored cable assemblies are available off-the-shelf for same day shipping with no minimum order quantities. Additionally we can custom manufacture armored cable assemblies to your specifications.

Our metal jacketed cables feature crush resistance of up to 1,500 PSI and our plastic armored cable assemblies offer up to 800 PSI of crush resistance.

Armored cables can be used in a variety of industrial applications including factory automation, manufacturing, and chemical and petroleum processing networks.
