HyperLink® Indoor and Outdoor Wi-Fi Amplifiers - Upgrade Your Operating Range and Performance

HyperLink® is the leader in bi-directional Wi-Fi amplifiers for wireless LANs. Consisting of a low-noise receive amplifier and a transmit power amplifier, they offer significant improvement in operating range and performance. HyperLink® amplifiers are compatible with spread spectrum wireless gear including IEEE 802.11a/b/g devices.

- 100 mW to 25 Watt Amp models available
- 2.4 GHz, 4.9 GHz, 5.8 GHz and 900 MHz support
- Automatic gain control and fixed-gain models available
- Indoor and outdoor industrial grade versions
- Low profile "Design-In" Modules available
- Custom configurations available

Amplifier products are available for export, military, licensed amateur radio (ham radio) and OEM component sales only and as part of complete FCC Certified Systems. Individual amplifier products are not offered for sale in the USA.

Please note that additional documentation may be required to purchase a HyperLink® amplifier. In those cases an L-com sales associate will contact you to complete your order.

RoHS HyperLink® 2.4 GHz Indoor PoE Amplifiers

HyperLink® PoE amplifier models feature a built-in Power-Over-Ethernet interface. This allows the amplifier to receive its power by the same CAT5 cable used to pass Data and Power to an additional PoE device. This eliminates the need for an additional DC Injector and coax cable, simplifying installation.
