

Premium Category 6 RJ45 to RJ45 Shielded Patch Cords

Category 6 has become the de facto standard when installing new network cabling. With high bandwidth applications on the rise and Ethernet network deployments venturing into new areas such as factory environments, the need for shielded Cat 6 cable assemblies has also increased. L-com has stepped up to this new demand and created a line of high performance Cat 6 patch cords that feature a 100% foil shield and the option of either a PVC or Low Smoke Zero Halogen (LSZH) jacket.

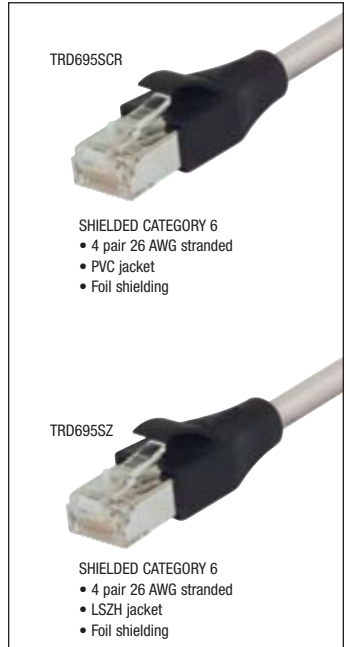

Item #	Description	Color	1-9	10-24	25-99	100-249	250-499
--------	-------------	-------	-----	-------	-------	---------	---------

RoHS Category 6 Shielded Patch Cords with PVC Jacket

This series features a RoHS compliant PVC jacket and a 100% foil shield. The four pair 26 AWG stranded Cat 6 cable is terminated with L-com's unique shielded Cat 6 plugs, with a fully crimped shield termination that doubles as a strain relief.

RoHS Category 6 Shielded Patch Cords with LSZH Jacket

This series features a LSZH jacket and a 100% foil shield. The four pair 26 AWG stranded Cat 6 cable is terminated with L-com's unique shielded Cat 6 plugs, with a fully crimped shield termination that doubles as a strain relief.

Hi-Flex Oil Resistant Category 5E Patch Cords for Industrial Automation Applications

With Ethernet connections now commonplace on PLCs, robots and factory equipment, regular patch cords will not cut it. L-com's line of Hi-Flex oil resistant patch cords are the best solution when Ethernet connectivity is required for continuous motion, harsh environments such as factory floors. With a low friction PUR jacket and a specially designed foamed core, these cables can handle the extreme abuse of constant motion (over a million cycles). L-com's unique 360-degree crimped strain relief ensures the connection remains solid and the termination does not get damaged.

RoHS Hi-Flex Oil Resistant Category 5E Patch Cords

This series features 26 AWG stranded conductors and a braided shield. The outer jacket is low-friction halogen-free PUR that is perfect for cable track applications.
