L-com's Tool-less Jack Series

For the best performance with a unique offset IDC connection that maintains conductor pairs up until the termination point, L-com's tool-less jack series is the answer. With a positive locking compression cap, users can be sure that conductors are securely locked into the jack. This series requires no special tools for installation. The compression cap acts like a punch tool by pressing the conductors into place. These jacks also feature EIA568A/B dual color-coding for universal usage in all network installations. Each jack is intelligently designed into a compact and efficient body which minimizes cross talk while easing installation.

Easy to read dual EIA568A/B code

Offset IDC design maintains conductor pairing for optimum performance.

Ultra slim body design

The tool-less jack series captivates conductors securely with a positive locking compression cap.

Tool-less termination speeds installations

RoHS Shielded Category 5E and 6 Jacks

L-com's shielded modular jacks offer users a complete solution to EMI/RFI problems. By utilizing fully shielded jacks and connecting hardware, users can reduce the effects of interference on the network data transmissions. All jacks feature 110-style punch down connections for fast and easy termination.

RoHS Category 3 RJ12 110 Keystone Jacks - Telephone and Data Applications

L-com's keystone Category 3 110 punch style connectors offer an economical choice with the popular 110-punch style connection system. Each jack is color coded for both the EIA and USOC standards for compatibility with any installation. Jacks are available in two colors to fit individual installations. Large volume quotations are available for installers and contractors looking to save money. Contact us today.
