Miller® Fiber Optic Termination Tools - Highest Quality at Affordable Prices

L-com is pleased to distribute Miller® fiber optic tools. We chose Miller for their reputation in the industry for high quality tools that are affordable. All tools are made in the U.S.A. and are fully guaranteed against defects in workmanship or material.

Tip **How to use fiber optic termination tools**

There are a number of commonly used tools that are utilized to terminate a fiber optic cable with a connector. Below are illustrations of how each of these tools is used.

<p>Glass fiber with buffer Jacket</p>	<p>Glass fiber with buffer Kevlar</p>	<p>Glass fiber Fiber buffer</p>	<p>Glass fiber</p>
<p>The fiber optic jacket stripper (FJS-3) is used to remove the fiber optic cable outer jacket.</p>	<p>The Kevlar shears (86-12SF) are used to trim back the Kevlar strength member commonly found in breakout fiber cable.</p>	<p>The fiber optic stripper strips the buffer coating that protects the fiber. A number of strippers are available for various fiber sizes.</p>	<p>The fiber optic cleaver (CC-125) is used to trim the glass fiber accurately. A cleanly cleaved fiber is essential for optimum performance.</p>

Miller® Fiber Optic Jacket Stripper

The Miller Fiber jacket stripper and cutter was designed to strip and cut 26-16 AWG (.40-1.3mm) wire sizes. This economical and easy to use tool is a must for fiber installers.

FJS-3	Fiber Optic Jacket Stripper	9.95	CALL	CALL	CALL
-------	-----------------------------	------	------	------	------

Miller® High Leverage Kevlar® Shears - Cut Teflon Easily

With a non-slip serrated blade, this tool provides the solution for trimming back the DuPont Kevlar® that serves as the central strength member in optical fiber. The tool is made of hot-forged, high carbon steel for long life. It has a quick action spring response so the tool is ready when you are. Its high leverage provides a powerful cutting action.

86-12SF	Kevlar Shears with Cushioned Grip	20.00	19.60	19.20	18.80
---------	-----------------------------------	-------	-------	-------	-------

Miller® No-Nik Fiber Optic Strippers - Strips Buffer Coating

No-Nik fiber optic strippers meet the most stringent specifications. When used properly, they are 100% reliable! Plastic heads, which make contact only with the buffer, center and support your work on both sides. Cutting blades made from razor quality steel score the buffer completely. Back-up blades support the cutting blades, nest positively and lock up when the tool is closed to maintain perfect concentricity. Buffer being removed acts as guide and protection for the fiber. Color-coded handles ensure proper tool selection, quickly and easily. **Note:** The NN-203 is the most popular choice for 125 micron fiber.

NN-152	No-Nik Stripper, 152 µm Min. Dia. Strip (Gold)	34.95	34.25	33.55	32.85
NN-175	No-Nik Stripper, 175 µm Min. Dia. Strip (Mustard)	34.95	34.25	33.55	32.85
NN-203	No-Nik Stripper, 203 µm Min. Dia. Strip (Red)	34.95	34.25	33.55	32.85
NN-254	No-Nik Stripper, 254 µm Min. Dia. Strip (Lt. Blue)	34.95	34.25	33.55	32.85
NN-305	No-Nik Stripper, 305 µm Min. Dia. Strip (White)	34.95	34.25	33.55	32.85

Miller® Comfort Fit Fiber Optic Stripper - Cuts Jacket Plus Strips Buffer Coating

This tool has a 1.0mm radiused blade and a 140µm V blade specifically designed for stripping jacket and buffer from 125 micron fiber. Ergonomically designed handle reduces user fatigue.

CFS-2	Comfort Fit Fiber Optic Stripper	28.00	27.44	26.88	26.32
-------	----------------------------------	-------	-------	-------	-------

Miller® Fiber Optic Safety Cleaver - Holds Cleaved Fiber for Disposal

The CC-125 is a professional tool that cleaves fiber consistently and accurately. It accommodates glass fibers with 125µm nominal cladding diameters. An additional safety feature is that cleaved fiber splinters are stored within the tool for proper disposal. Carbide blade is conservatively rated at 1000 uses.

CC-125	Fiber Optic Safety Cleaver	225.00	220.50	216.00	211.50
--------	----------------------------	--------	--------	--------	--------

Fiber Optic Consumables - Commonly Used Fiber Optic Cleaning Components

Cleaning fiber optic connections is crucial for proper optical transmission. Compressed air is great for cleaning couplers and connector ends. Kimwipes are lint free tissues, commonly used for cleaning glass surfaces.

FOC-CA	Compressed Air, 12 oz. Can	9.95	9.35	8.76	8.16
FOC-KN	4.5" x 8.5" (11.4cm x 21.6cm) Box Kimwipes, 280 Count	4.95	4.85	4.75	4.65
FOC-AP	Pre-moistened Alcohol Pads, 20 Count	9.95	9.75	9.55	9.35

Fiber Optic Pulling Eye for Duplex Cable Assemblies

A pulling eye is used to protect the terminated end of fiber cable assemblies when pulling through walls or ceilings. 16" long x 0.75" (40.6 x 1.9 cm) diameter plastic tube fits most cables with two connectors.

FOC-EYE	Dual Fiber Pulling Eye	26.95	25.33	23.72	22.10
---------	------------------------	-------	-------	-------	-------

RoHS Duplex Clips for SC Connectors

These handy duplex clips can be used to join two individual SC connectors together to become a duplex assembly. These one piece clips simply snap into place securely connecting the two individual connectors together. These clips can be used on virtually any simplex SC connector and can be removed and reattached as needed.

FOC-SC	SC Duplex Clip	1.75	1.61	1.47	1.33
