**Parabolic Dish Antennas - Superior Strength Design Ensures Durability**

Our Wi-Fi parabolic dish antennas feature a high quality aluminum reflector dish for superior strength. The dish is coated in a light gray UV-inhibited polymer for durability and aesthetics. These directional dish antennas can be used in point to point as well as point to multipoint applications.

Built to withstand the elements, HyperLink Brand dish antennas offer high performance at competitive prices. When designing these Wi-Fi parabolic dish antennas, our design team factored in requirements such as location usage and environmental extremes. From versatile mounting options to features such as perforated reflectors, these antennas were built to withstand the test of time while maintaining optimal performance.

- Point-to-point systems
- Point-to-multipoint systems
- High quality aluminum construction
- All weather operation
- Many frequencies to choose from
- RoHS compliant

Parabolics available from 246mm to 900mm for all point-to-point applications.

**Mounting:** The HG5829D is supplied with a tilt and swivel mast mount kit which allows installation at various degrees of incline for easy alignment. It can be adjusted up or down from 0°-30°.

**✓RoHS Radome Cover Kits**

HyperGain® radome covers are an ideal way to provide additional protection to our parabolic dish antennas. These lightweight radome kits feature fiberglass construction and UV stable gray finish. Drain holes are provided on the radome cover to help prevent moisture build-up inside the dish antenna.

[HG5833D](#) - Perforated holes in the 900mm diameter dish antennas help reduce wind loading.

Fiberglass Cover Kits - Protects against the elements.

**Tip** Easily attach a radome cover

L-com's HyperLink Brand radome kits bolt directly to the dish antennas with the provided stainless steel hardware. Drilling mounting holes in the antenna is not required. The radome cover can be attached to existing antennas already mounted in the field or preassembled to the antenna before mounting.
