Faster Speed and Longer Distance
Adopting IEEE 802.11n advanced MIMO technology, the WNAP-6335 provides reliable wireless network coverage and incredible improvement in the wireless performance by delivering data rate up to 300Mbps. As an IEEE 802.11b/g/n compliant wireless device, the WNAP-6335 is able to give stable and efficient wireless performance for long distance application. With its adjustable output power up to 500mW and RP-SMA antenna connectors, it can directly connect with various high gain antennas to extend wider coverage for outdoor long-ranging application.

Industrial Compliant Wireless LAN & LAN
- Compliant with IEEE 802.11n wireless technology capable of delivering data rate up to 300Mbps
- Backward compatible with 802.11b/g standards
- Equipped with 10/100Mbps RJ45 ports for LAN and WAN; auto MDI/MDI-X supported

Fixed Network Broadband Router
- Supported connection types: Dynamic IP, Static IP, PPPoE
- Supports Virtual Server and DMZ for various networking applications
- Supports DHCP Server, UPnP and PLANET Dynamic DNS

RF Interface Characteristics
- Built-in RP-SMA antenna connectors
- High Output Power up to 500mW with multiply-adjustable transmit power control

Outdoor Environmental Characteristics
- IP55 enclosure
- Passive Power over Ethernet design
- Operating temperature: -20~70°C

Multiple Operation and Wireless Modes
- Multiple Operation Modes: Bridge, WISP
- Multiple Wireless Modes: AP, Client CPE (WISP), WDS PtP, WDS PtMP
- Supports WMM (Wi-Fi Multimedia)

Reliable and Secure Network Connection
- Supports Software Wi-Fi Protected Setup (WPS)
- Advanced Security: 64/128-bit WEP, WPA, WPA2, WPA-PSK / WPA2-PSK (TKIP/AES), and 802.1x authentication
- Supports IP/Protocol-based access control and MAC filtering
- Supports self-healing (Schedule Reboot) mechanism for reliable connection

Easy Installation and Management
- Web-based UI and quick setup wizard for easy configuration
- SNMP-based management interface
- System status monitoring includes DHCP Client and System Log

Designed for Various Requirements of Wireless LAN
The WNAP-6335 supports multiple wireless communication connectivities, including AP/Router, WDS PtP, WDS PtMP and WISP modes, that meet various application requirements to enable users to gain more comprehensive experience. It also helps users to easily build wireless network and extend the wireless range of the existing wireless network.
Advanced Security and Rigorous Authentication
In aspect of security, besides 64/128-bit WEP encryption, the WNAP-6335 is integrated with WPA / WPA2, WPA-PSK / WPA2-PSK and 802.1x authority to secure and protect your wireless LAN. The wireless MAC filtering and SSID broadcast control are to consolidate the wireless network security and prevent unauthorized wireless connection.

Flexible and Reliable Outdoor Characteristics
The WNAP-6335 is definitely suitable for such applications as IP surveillance, backhaul link of building to building and backbone of public service. Additionally, the self-healing and schedule reboot capability keeps connection alive all the time. Meeting the IP55 rating for outdoor UV resistant enclosure, the WNAP-6335 can perform normally under rigorous weather conditions, meaning it can be installed in any harsh, outdoor environments. With the proprietary Power over Ethernet (PoE) design, the WNAP-6335 can be easily installed in the areas where power outlets are not available.

Easy Deployment and Management
With user-friendly Web UI and the Planet Smart Discovery Utility, the WNAP-6335 is easy to install, even for users who never experience in setting up a wireless network. Furthermore, with the PLANET Dynamic DNS service and SNMP-based management interface, the WNAP-6335 is convenient to be managed and configured remotely.
Applications

Flexible Outdoor Wireless Solution

The WNAP-6335 is a cost-effective outdoor wireless LAN solution for widely open space applications. It is definitely suitable for outdoor wireless connections between buildings and IP surveillance facilities. Furthermore, the WNAP-6335 can perfectly prevent damage from lightning surges when functioning with PLANET ELA-100, the Ethernet Lightning Arrest Box, which assures the connection stability.

With built-in RP-SMA connectors, the WNAP-6335 can equip with various antennas that will bring higher performance and longer distance of wireless connection. The WNAP-6335 provides high output power with multiply-adjustable Tx controller, which allows CPE users to easily install and adjust the suitable power output in appropriate locations. When connecting with the WNAP-6335, the system integrator is able to provide a reliable IP surveillance solution to increasing wireless coverage of the IP camera.

**We recommend you to match the WNAP-6335 with our related products to get the best results.**

| Max. Wireless Clients | 25  
|-----------------------|------------------|
| Max. WDS APs | 8  
| Max. Wired Clients | 60  
| WMM | Supports Wi-Fi multimedia |
| QoS | Supports Quality of Service for bandwidth control |
| NTP | Network Time Management |
| Self Healing | Supports Schedule Reboot |
| Management | Web UI, DHCP Client, Configuration Backup and Restore, Dynamic DNS, and SNMP |
| Diagnostic Tool | System Log, Ping Watchdog |

### Mechanical and Power

| IP Level | IP55 |
| Material | Outdoor UV Stabilized Enclosure |
| Dimensions (W x D x H) | 127 x 63 x 254 mm |
| Weight | 366g |
| Installation | Pole mounting or wall mounting |

#### Power Requirements

- **LAN1**
  - 24V DC, 1A Passive PoE
  - Pin 4,5 V DC+
  - Pin 7,8 V DC-
  - Pin 3 Reset

#### Power Consumption

- 12W

### Environment and Certification

- **Operating Temperature**: -20~70°C
- **Operating Humidity**: 10~95% non-condensing
- **Regulatory**: CE, FCC, RoHS

### Accessory

- **Standard Accessories**
  - WNAP-6335 x 1
  - 24V DC Passive PoE Injector & Power Cord x 1
  - Plastic Strap x 1
  - Quick Installation Guide x 1
