

## How are right angle adapters used?

Right angle adapters assist in connecting cables in tight spaces by allowing the cable to mate at a 90 degree angle. This reduces the backshell and cable bend distance required when mating cables. L-com offers right angle adapters in DB9, DB15, DB25 and HD15 male to female configurations with three cable exit directions each. Hardware is reversible allowing for use in virtually any application.

**Figure 1**  
Cables require approximately 2.5" to exit a mating connector depending on backshell length and cable diameter/flexibility.

**Figure 2** Mating to a female connector  
Choose the proper adapter for desired cable exit direction and simply plug the cable into the adapter.

## New Cable Exit 3 allows the user to rotate the female connector 180° compared to Cable Exits 1 and 2.
