

What makes L-com's Right Angle Category 5e cable design superior?

Our competitors' right angle cable designs are inferior as they do not maintain the proper pair twists as the cable enters the right angle. These cables have no mechanism for controlling the twisted pairs as they travel through the right angle strain relief. We tested these cables

ourselves and they do not pass Cat5e testing for NEXT or Return Loss. L-com's unique patented design utilizes a specialized channel separator and load bar to maintain the twists through the right angle. L-com's right angle cables are truly Cat5e rated.
