## Description

L-com's LCCA30277-FT10 is a low loss SMA male to TNC male right angle cable assembly using LMR-240-DB coax, 10 FT with Times Microwave components and ships same-day. The LMR-240-DB coax of this SMA cable uses the PE (F) dielectric with a VoP of $84 \%$, resulting in very low insertion loss compared to solid dielectrics. These flexible RF cable assemblies are ideal for applications where flexure is required. Our L-com SMA to TNC cable assembly has a male to male gender configuration with flexible LMR-240-DB series coax and operates to 5.8 GHz . The double shield of this SMA cable is layered by tinned copper braid over aluminum tape providing shielding effectiveness greater than 90 dB . This right angle TNC cable interface on the LMR-240-DB coax allows for easier connections in tight spaces. *LMR ${ }^{\text {TM }}$ is a trademark of Times Microwave Systems.
Custom versions of this SMA male to SMA male cable, along with the rest of L-com's other RF assemblies, can also be built and shipped same day. Other available RF cable assembly value added services from L-com include connector orientation or clocking, heat shrink booting and custom labeling. RF testing can also be performed to document the electrical performance of your cable assembly. Contact a sales representative for testing or custom RF cable quotes.
