#### Description

L-com's LCCA30718-6IN is a Test Probe SMA Female 2 Hole Flange to Straight Cut Lead Cable Assembly using LC085TB Coax, 0.5 FT and ships same-day. L-com's formable cable assemblies provide a convenient alternative to their semi-rigid versions, as they offer similar electrical performance but can be bent to desired shape without the use of special tools. Our L-com SMA to flush cut cable assembly has a Female to sexless gender configuration with formable LC085TB series coax and operates to 18 GHz. The tinned copper braid outer conductor can be easily formed by hand and has an overall diameter of 0.085 inches.

The Test Probe SMA Female 2 Hole Flange to Straight Cut Lead Cable Assembly using LC085TB Coax, 0.5 FT is a convenient test probe designed to be trimmed by the user to their required dimensions and soldered to an exposed microstrip trace to inject a signal or to measure a signal of interest. Each LCCA30718-6IN cable assembly is built with a connector on both ends to verify the electrical performance of 18 GHz with a maximum VSWR of 1.4:1. The cable is then trimmed and placed in a reusable protective tube. These test probes are available with a flush cut or a pre-trimmed cable lead.

Custom versions of this SMA Female to straight cut lead cable, along with the rest of L-com's other RF assemblies, can also be built and shipped same day. Other available RF cable assembly value added services from L-com include connector orientation or clocking, heat shrink booting and custom labeling. RF testing can also be performed to document the electrical performance of your cable assembly. Contact a sales representative for testing or custom RF cable quotes.
