

INFINITE[®]
ELECTRONICS, INC.

POWERING CONNECTED MANUFACTURING

CONNECT / AUTOMATE / OPTIMIZE

One portfolio of specialized connectivity companies, engineered to keep smart manufacturing, automation, and robotics systems running; from the network to the machine.

OUR PORTFOLIO OF CONNECTIVITY COMPANIES

INDUSTRIAL MANUFACTURING, AUTOMATION & ROBOTICS

■ Connect Critical Systems

Build resilient network and communication systems that support and maximize operational uptime.

■ Support Smart Manufacturing

Enable automation, robotics, edge computing, and industrial IoT initiatives with scalable connectivity infrastructure.

■ Perform in Harsh Conditions

Maintain reliable performance with ruggedized connectivity solutions designed to withstand extreme temperatures, moisture, dust, and vibration.

CONNECTED MANUFACTURING FROM THE NETWORK TO THE MACHINE

From network infrastructure to machine-level connectivity, the Infinite Electronics family of companies provides specialized solutions and expertise to help you connect, automate, and keep operations moving.

NETWORK & DATA

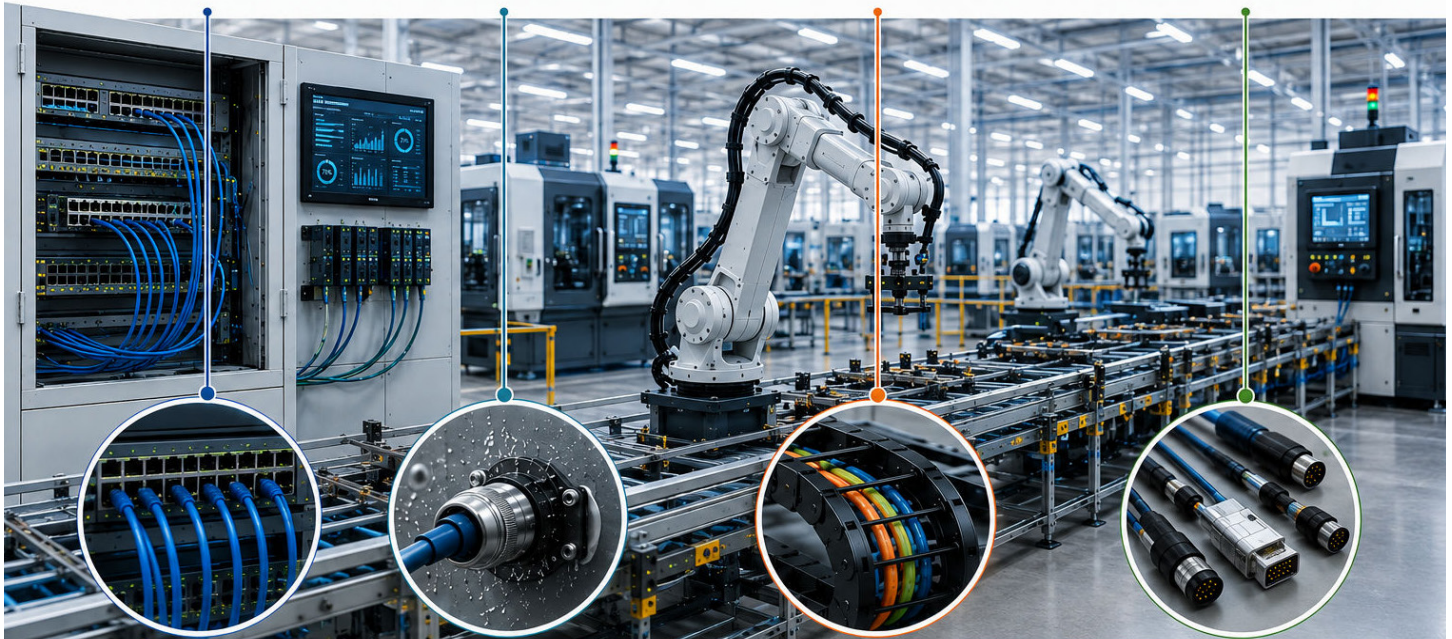

RUGGED CONNECTIVITY

MOTION & AUTOMATION

CUSTOM CONNECTIVITY

EVERY CONNECTION. EVERY SYSTEM. EVERY DAY.

Integrated connectivity solutions that help you build smarter, more reliable, and more productive operations.

MAXIMIZE UPTIME

REDUCE COMPLEXITY

IMPROVE PERFORMANCE

BUILT TO SUPPORT YOU

NETWORK & DATA CONNECTIVITY

Ethernet | Wireless | Structured Cabling | Fiber | Industrial Networking

Network and data connectivity solutions for industrial automation, IIoT, and connected manufacturing environments.

- Connect machines, controls, and production networks.
- Enable reliable data transmission across automated systems.
- Support IIoT, edge computing, and smart factory applications.

EXPLORE →

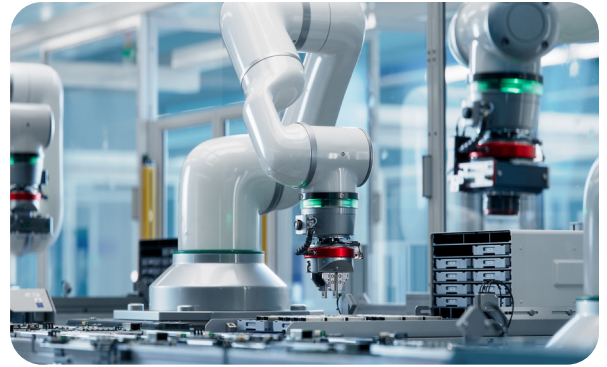

RUGGED CONNECTIVITY

Power | Signal | Data | IP-Rated Connector | Rugged Solutions

Rugged power, signal, and data connectivity engineered for harsh and demanding industrial environments.

- Maintain reliable connections in demanding environments.
- Protect power, signal, and data from dust and moisture.
- Support machine tools, robotics, and industrial equipment.

EXPLORE →

MOTION & AUTOMATION CABLING

Flexible Cable | Continuous Motion | Servo | Control | Robotics & CNC

Specializes in flexible power, control, data, and servo cables for continuous motion, industrial machinery, robotics, and automation.

- Support continuous motion in robotics and automated equipment.
- Deliver reliable power, control, and data transmission.
- Withstand repeated flexing and demanding operating conditions.

EXPLORE →

CUSTOM CABLE & CONNECTIVITY

Cable Assemblies | Harnessing | Custom Configurations | Tech Support

Custom cable assemblies and harnessing solutions engineered to meet application-specific connectivity requirements.

- Meet application-specific requirements with custom solutions.
- Simplify complex connections with custom cable assemblies and harnesses.
- Get engineering support from design through production.

EXPLORE →

WHERE EVERY CONNECTION MATTERS

Infinite Electronics portfolio of companies brings together a global platform of companies focused on one thing: building high-performance connectivity solutions that power progress.

Across industries including industrial automation, data center, medical aerospace, agriculture, military and more, customers rely on our connectivity solutions to meet demanding performance, reliability and compliance requirements in complex operating environments.

SIMPLIFY SOURCING

Access trusted solutions across the Infinite Electronics portfolio.

ACCELERATE DEPLOYMENT

Extensive product availability, reliable quality, and short lead times.

CUSTOM SOLUTIONS

Engineering support for tailored solutions built around your requirements.

TECHNICAL EXPERTISE

Specialized technical expertise to solve complex application challenges.

ONE PORTFOLIO. SPECIALIZED EXPERTISE.
